## Technology & Social Media (Sample Essay)

Technology plays an important role in my daily life. I use my smartphone and laptop for work, study, and entertainment. The internet helps me access information quickly and stay connected with others.

I spend a lot of time on social media platforms. I often scroll, watch videos, and chat with my friends. Sometimes, I post photos and share my thoughts online. Social media is a great way to communicate and follow trends.

However, I think it is important to use technology wisely. Too much screen time can cause stress and addiction. I try to reduce my screen time and focus on real-life activities.

In my opinion, technology is very useful if we use it in a balanced way. It helps us learn, work, and connect with the world more easily.
